

KEINHER IRIBARREN

Full Stack Developer

+34611356292 iribarrenkeinher@gmail.com Sevilla, España

EXPERIENCE

Semi Senior FullStack Developer

Microvoz

- 06/2022 LATAM, Argentina
- I designed and implemented new functional modules that expanded the capabilities of the system, facilitating the incorporation of new clients and improving the user experience.
- I lead the migration and optimization of the backend in Laravel, integrating Laravel Octane to significantly improve system performance and reduce response times.
- Implemented SOLID principles to ensure clean, readable and scalable code, facilitating maintainability and continuous evolution of the platform.
- I performed maintenance and evolution of vanilla PHP applications, fixing issues, refactoring code and improving system stability and performance.
- I implemented Elasticsearch, managing indexes and optimizing queries to improve relevance and speed.
- I collaborated in the planning of new functionalities, defining requirements and aligning objectives with the business.

FullStack Developer

Doover+Network

- 04/2022 - 08/2023 España
- I developed from scratch a SPA web application, using Laravel 9 as RESTful API and Quasar Framework with Vue.js in the frontend, achieving a dynamic, modular and highly responsive interface.
- I integrated Stripe, implementing collections, authorization and webhooks for secure payments and fluidity in the experience.
- Automated daily tasks with Linux cronjobs to ensure timely and flawless execution.
- I planned and designed the entity-relationship model in MySQL, structuring optimized schemas that guarantee data integrity and high query performance.

Backend Developer

Cronapis

- 05/2021 - 10/2021 Panama
- I developed from scratch a REST API in Laravel 7 to be consumed by a SPA and a mobile app, designing scalable endpoints that met the needs of both platforms.
- Implemented authentication with Laravel Sanctum, managing tokens and securing API paths for SPA and mobile.
- Managed cron jobs in Linux to automate backups, log cleaning and report generation.

EDUCATION

Senior Technician in Computer

Universidad+Nacional+Experimental+de+la+Gran+Caracas+(UNEXCA)

- 07/2020 Caracas, Venezuela
- Graduated

SUMMARY

Full Stack developer with more than 3 years of experience in creating and maintaining robust and scalable web applications. Expert in PHP (native and Laravel) and JavaScript (vanilla and Vue.js), with solid experience in design and implementation of relational and NoSQL databases (MySQL, MongoDB). Proficient in agile methodologies and version control (Git), project management (Jira, ClickUp) and deployment in Linux environments using Docker. Passionate about performance optimization, code quality and best practices (Clean Code), oriented to deliver efficient and high value solutions for the business.
